GOING NORTH.

Hammond & Wilson's stage leaves for Susanville at 3 A. M.; returning at 8 P. M. Fare \$12.

DIPHTHERIA—A SURE CURE OF THIS TERRIBLE DISORDER.

Please publish the following treatment of diphtheria. It has been used by myself, and others to whom I have given it, in over one thousand cases, without a failure. It will always cure if the treatment is commenced before the diphtheria membrane extends into the air tubes, which is known by the great difficulty of breathing and restlessness. In such cases no remedy yet discovered will always effect a cure; but if the patient is watched, and this treatment used in time, there is no danger.

I sent this treatment to a friend of mine in Wisconsin, and he used it on himself and family with such wonderful success that he requested me to send it to you for publication, as this horrible disease is prevailing extensively in parts of Missouri:

DIPHTHERIA WASH.

Golden seal, pulverized, 1 drachm.
Borax, " 1 "
Black pepper, " 1 "
Alum, " 1 "
Nitrate potash, " 1 "
Salt, " 1 "

Put all into a common sized teacup or vessel which holds about four ounces, and pour full of boiling water, stir well, and then fill full of good vinegar. Fit for use when it settles. Make a swab by getting a little stick about the size of a pipe-stem, notch one end and wrap a strip of cotton cloth around it, letting the cloth project about half an inch beyond the stick so as not to jag the mouth and throat, and fasten with a thread.

Swab the mouth and throat well every half hour if the case is bad, every hour if not bad. When the patient gets better, every two hours; and when still better, two or three times a day, till well; which will be from two to seven days. Touch every affected spot, the uvula, tonsils and fauces, the whole of the back part of the month and top of the throat; and let the patient swallow a little of the wash each time you swab. Swabbing causes no pain, though the patient will gag and sometimes vomit; but swab well, and a feeling of relief will follow every swabbing.

Let every patient have a separate swab and wash, as the disease is undoubtedly infectious. Keep the pure by pouring what you use each time into another vessel, and also wipe off any matter or slime that may be on the swab, every time you take it from the month.—Missouri Democrat.

A FAMOUS FIDDLE—A violin just bought by a Russian for \$2,000 has a curious history. It was sold by its maker, Stainer, to a certain Count, who promised in exchange to pay \$250, to furnish Stainer a good dinner as long as he lived, \$50 the first of each month, a complete outfit once a year, two barrels of beer, his lodgings, fire, light, and in case that he married, as many hares as he required for his table, and two baskets of fruit for himself and two for his old nurse annually. These conditions were fulfilled for eighteen years, until Stainer died.

ENGLAND has 140 daily papers, 84 of them morning journals, 29 of which are published in London. In Paris there are 61 dailies.

LIST OF LETTERS:

The New Comet.

Prof. Lewis Swift, who improvised an observatory on the shore of Lake Ontario from which to get the last glimpse in this country of Coggia's comet, announces that he has seen the new comet which Prof. Borely, of Paris, discovered a few days ago. In a letter to the N. Y. Tribune he says:

"Tidings of the discovery of a new comet by Prof. Borely, of Paris, reached me yesterday morning. Its position at the time of discovery (on the morning of Feb. 8) was: right ascension, 17 hours, 13 minutes; declination south, 1 and 37 min. Its daily motion was 1 min. 44 sec. east and 3 7 min. north. Armed with this intelligence, which was cabled for the benefit of American astronomers, I determined on making an effort to find it, which I succeeded in doing a little past 1 o'clock this morning, after only one minute's search. I have not time to tell you much about it now, but may do so when, after further observations, more is known.

"The comet is very large, quite uniform in outline, and for a telescope cannot bright, but with my utmost effort I failed to see the bright nucleus of which the discoverer speaks. It has a strong central condensation, and at half-past two was faintly but distinctly visible to the naked eye. Though the sky was unusually clear, I failed to detect a tail, or any indications that an effort to form one was in progress; but in a word of so much activity that appendage, which is a characteristic feature for a large majority of comets, could easily and suddenly begin to form, and in a short time surprise the world with its mighty proportions. The great comet of 1813 'exhausted' its head in the manufacture of its tail, which it threw off at the rate of 10,000,000 miles a day. The comet is moving toward Alpha Lyra (Vega), which it will pass in about five days, and in less than two weeks will be visible in the evening sky under the pole. I think it is increasing in brightness, but of this I am not certain. Where so little is known but little can be said. I therefore anxiously await further observations. By the time this reaches the readers' eye the comet will be midway between Alpha Serpentarius and Alpha Lyra.

The Welsh Language.

Wirt Sykes in Harper.

No Welsh is heard in the streets of Cardiff. It is preached in some pulpits and spoken in some homes, and the most cultivated bourgeois take pride in their knowledge, but the same more or less, of the Welsh language and literature; but for the common uses of life the English language is as much the language of Cardiff as it is of New York. As for the Welsh language even the slight knowledge of a beginner in the study of this noble tongue is sufficient to show that the descendants of the Cymry are amply warranted in their affectionate pride of it. It is a terrible tongue to look at, but it is musical to hear, having seven vowels, and being full of soft liquid sounds. It is a most copious language, too, containing no fewer than eighty thousand words, and from this fact, with others which the student early recognizes, it is easy to believe that it has greater scope for the utterance of political sentiment than the English language has. The pronunciation is easy and flowing, so that, with its many incessantly recurring vowels, it is an easy language to sing, much more so than the English, and only second in this respect to the Italian. A stranger encountering the name of Ebbw Vale (one of the fair valleys near the flowing Usk) might easily suppose it to be a jaw-breaker of a word to pronounce, but the pronunciation is ebbow. So with cwrw (beer) the pronunciation is kooroo. Wherever w occurs it has the sound of double o as in pool.

We often find that an eloquent speaker is like a river—greatest at the mouth.

SOURCES OF THE NILE.—Two of the leading newspapers of this country and England—the *New York Herald* and *London Daily Telegraph*—have a mania for geographical discovery; and now have in their joint employ Mr. Henry M. Stanley, who is exploring the wilds of Central Africa for the sources of the Nile. Whether he will discover that long sought for mystery of physical geography or be eaten alive by the natives of Tanganyika, is a problem yet to be solved. The latter would be a sadder fate than that of heroic Dr. Livingstone. The *Herald's* London correspondent telegraphs that he has letters from Stanley written on the 13th of last August; that Stanley has explored the equatorial regions beyond the Lakes Victoria and Albert Nyanza, and after a perilous journey of several months comes to the conclusion that the Egyptian Nile is the issue of the united Blue and White Niles, the former flowing from the mountainous regions of Abyssinia, and the latter from the equatorial lakes, which are fed by the immense watershed that surrounds them. So far so good. Now let Mr. Stanley pursue his investigations and tell us the more exact sources of the Nile. Then we will accord to the *New York Herald* and the *London Daily Telegraph* the fame which was denied Burton, Speake, Livingstone and other celebrated explorers of Central Africa.

COMPULSORY EDUCATION.—The State of New York has a compulsory education law which prohibits children between the ages of eight and fourteen years being employed in factories and workshops who have not received fourteen weeks' schooling during the year. But the law has been evaded in various ways, and to make it more practical the Board of Education has increased the "agents of truancy," whose duty it is to visit all the factories and workshops in the State and see that the law is thoroughly enforced.

Compulsory education laws are needed in every State of the Union. Thousands of poor and illiterate parents fail to appreciate the advantages of education, and compel their children to labor the entire calendar year. A compulsory education law, strictly enforced, would correct this wrong, and elevate the masses to a better appreciation of self-government and free institutions.

RESUMPTION.—Mr. Edward Atkinson, an eminent financial writer, and one who has given much thought to the resumption of specie payments, recently delivered an interesting address before the Free Trade Club of Boston, on resumption, and the means and methods to reach it. He expressed the belief that it is practicable to return to a specie basis at once, and without further legislation. He would have the Secretary of the Treasury buy up the legal tender notes with four and one-half per cent. bonds, and in this way reduce the present volume of the currency. This proposed reduction, he thinks, would restore the balance of the currency to par. Here is an idea for the new Secretary to ponder over.

The Democrats of Texas offered a prize banner, to be given to the state showing the largest majority for Tilden, feeling assured that their own state, which gave a Democratic majority of 103,000 in 1875, would win the prize. The State of Georgia, however, gave Tilden a majority of 69,632, while Texas gave him 59,935. The banner, which is a very large and is a beautiful piece of workmanship, has just been obtained at a cost of \$150, and a committee will be sent with it to Georgia.

SAFETY ENVELOPES.—To prevent tampering with letters while passing through the mails, a safety envelope has been invented. On the flap of the new envelope the words "Attempt to open" are printed with a double set of chemicals, the first impression containing nitric acid, and the second green vitriol. If the flap be steamed or moistened in any way the magic printing will appear to betray the attempt to open.

A boy, nine years of age, was left at home in Sheffield, England, to take care of his little baby sister. He tried to set her clothes on fire; failing in this he began cutting her throat with a carving knife. The neighbors fortunately came to the rescue, when the barbarous wretch attempted to hang himself, being back in the face when out down.

STICK TO YOUR BUSINESS.

There is nothing which should be more frequently impressed upon the minds of young men than the importance of steadily pursuing some one business. The frequent changing from one employment to another is one of the most common errors committed, and to it may be traced more than half the failures of men in business; and much of the discontent and disappointment which render life uncomfortable. It is a very common thing for a man to be dissatisfied with his business, and to desire to change it for some other, which it seems to him, will prove a more lucrative employment; but in nine cases out of ten it is a mistake. Look round you, and you will find among your acquaintance abundant verification of our assertion. There is no honest farmer who has toiled a few years, got his farm paid for, but does not grow rich very rapidly, as much for lack of contentment mingled with industry as anything, though he is not aware of it. He hears that Texas is the golden land of promise and that a fortune can be made in a few years; mortgages his farm to raise money and goes away, and, after many months of hard toil, comes home to commence again at the bottom of the hill for a more weary and less successful climbing up again. Mark the men in every community who are notorious for ability and equally notorious for never getting ahead, you will find them to be those who never stick to any one business long, but are always forsaking their occupation just when it begins to be profitable.

A YACHTING voyage around the world is something of a novelty. Early in April a steamship will start from London for a nine months' calling at Bordeaux, Corunna, Lisbon, Caliz, Gibraltar, Tangiers, Algiers, Barcelona, Genoa, Spezia, Naples, Messina, Malta, Constantinople, Smyrna, Joppa, and Alexandria. The vessel will then proceed through the Suez canal, allowing sufficient time for the passengers to visit the pyramids and other objects of historical interest in the neighborhood. From the Red sea the vessel will proceed to India, Indo-China, China and Japan. At San Francisco passengers desirous of visiting the scenery of the North American continent will be provided with free railway passes to New York, whence they again join the vessel. After leaving South America, touching at all the chief ports, the vessel, after visiting the West Indies and touching at New York, will return to England. The fare for this pleasure excursion will be \$500, including everything except wines and spirits.

Nothing has yet been heard of ex-Mayor Hall of New York. The dispatch of day before yesterday stating that he was at the Sportsman's Club at Islip was false. The impression now is that he has either committed suicide or been murdered.

In the United States, where a whisky shop, a blacksmith shop, a grocery, and two or three residences constitute many a "city," it is strange to read that the English are only now talking of elevating the great port of Liverpool to civic dignity. Yet such is the fact, Liverpool is only a town.

The Grangers of California are to hold a convention in San Francisco next month to consider educational matters, in response to an invitation issued by Golden Gate Grange of that city.

Two hundred railroad companies in the United States fail to pay the interest on their bonded debts, the aggregate of which is \$1,800,000,000. These institutions are badly regulated.

Numerous petitions were sent to the Governor of Utah for the pardon or commutation of sentence of John D. Lee, who was shot at Beaver yesterday, but he declined to interfere.

Virginia is to have another paper. It is to be a weekly, and will be called the *Messenger*.

THE PUTE CHIEF ALMOST DEAD.—H. B. Maxon of Big Meadows informs us that Naches, who has been sick for some time past but was reported much better a week ago, has had a relapse and last Sunday was worse than any time before. His lungs are affected, and when Mr. Maxon last saw him he could scarcely utter an articulate sound and he considers his recovery extremely doubtful.—*Wian, Silver State*.

Four only of the 58 signers of the declaration of Texan independence are yet alive, and it is only 42 years since they signed, and but one of the four resides in Texas.

TELEGRAPHIC MELANGE.

MOST IMPORTANT ITEMS IN YESTERDAY'S DISPATCHES.

Lee's Execution.
LEE was shot yesterday. He was sitting on his own coffin. He fell pierced through the heart by three bullets. His last wish was to have his photograph taken and given to his favorite wife Rachel. The best of order prevailed.

Failure—The Caucasians Explain.
SAN FRANCISCO, March 23.—The suspension is announced of the stock broking firm of Callaghan & Lynch. Liabilities \$900,000; assets yet undetermined. The failure is caused by the recent depression in the stock market.

The leading spirits of the order of Caucasians, charged with the responsibility for the late Chico outrage, propose a convention of the officers of the Order, the newspaper representatives, Colonel Bee, and the Rev. Oatis Gibson, to whom shall be submitted the Constitution, Manual, Ritual, etc., of the Order, to prove whether there is anything in its teachings calculated to excite violence against the Chinese.

Another Story.
New York, March 23.—It has been ascertained that ex-Mayor Hall's visit to Brooklyn on Friday night last was to transact business for a well known wealthy lady who is about bringing action for divorce against her husband, and was not in any way connected with the Kate Claxton affair.

Dr. Mary Walked Out.
New York, March 23.—A Washington special says Dr. Mary Walker was forcibly ejected from the Treasury Department yesterday.

Unlucky Actress.
New York, March 23.—The *World* says that Rose Ewing and Kate Claxton will soon bring suits for divorce from their husbands. Both cases are in the hands of ex-Mayor Hall.

New South Carolina Is Disposed of.
WASHINGTON, March 23.—The President today sent letters to Hampton and Chamberlain inviting them to come here and talk things over.

The following very clever and sublimely impudent dodge was some time since adopted by a Parisian thief: A lady, entering her apartment, discovered that a man was beneath her bed. With much presence of mind she exclaimed: "Oh, dear, what a bore! I forgot my parcel after all," and presently left the room, locking the door. The thief looked out of the window, and saw there was no escape that way, and so he proceeded to undress himself and get into the bed. Before long a key turned in the door, and a voice came from the bed, as the lady, accompanied by an officer of police, entered, asking: "Why, what's all this about?" Then, as they approached the bed, he exclaimed: "Ah, ah! I see how it is. Madam is tired of me, is she, and thinks she'll be rid of me in this way? Well, well, I'll go." In vain the lady indignantly protested, and demanded his arrest. The officer thought it would be useless, under the circumstances, to detain him, and he was soon out of bed and away.

ON BUSINESS.—General Batterman, Warden of the State Prison, was in the city yesterday. The General represents a great industry now, and is making the most of it for the good of the State. Yesterday he brought samples of boots, etc., made in the prison here to show our business men what an improvement had been made in the work recently, and how much cheaper he could sell the manufactured articles than they could be purchased either East or in San Francisco. He also showed them how he could undersell them all if obliged, for the want of their co-operation, to open a boot and shoe store in Virginia. The General is a success, and the result will be patronage for the institution over which he presides, and cheap and good boots and shoes for the Comstockers. When facetiously asked to show his license the General said the State of Nevada was his license, and that was the reason he could undersell them all if they did not buy his wares.—*Enterprise of yesterday*.

TROUT-FISHING.—Those of our people who go to the Truckee river trout-fishing will do well to be careful about their bait, if they wish to have any success. The only bait with which they can succeed at this season of the year is a worm that is found in the greasewood. This worm eats a ring around the main stalk of the greasewood, and is easily found by observing that the tops of the greasewood bushes are dead. The trout will bite at these worms when they will touch no other kind of bait. The Putes and a few old settlers know how to find this peculiar bait, and are successful fishermen when all others fail. The dead leaves on the tops of the greasewood bushes show where the worms are, and all that is necessary to be done is to kick over the bushes to find the bait, as the shrubs break off at the point where the worms have ringed them.—*Enterprise*.

THE LAND OF GOLD.

The Black Hills Country as Seen by a European—Flattering Prospects—The Great test Country in the World—Former Citizens Heard From—Indians Bad—The Town and Gulches.

[From Eureka Sentinel of 21st.]
W. A. Durlay yesterday received the following interesting letter from C. H. Robinson, formerly his partner here in the harness business, which he has given us for publication:

DEADWOOD CITY, March 8, '77.
I received your letter to-day and hasten to answer. I still remain in Deadwood, but am at present doing but little. Times are very dull just now. I have got a very good cabin for which I have been offered \$300; two town lots worth \$500 each, and four acres of land that I think will be valuable in the Spring, being situated directly in the town. Money is very scarce. I am going out prospecting as soon as the snow goes off. We have had a very hard winter, the snow being from four to six feet deep, and, as yet, on the north side of the hills has not commenced to melt. The emigrants are arriving thick and fast. I saw John Ellenbaugh and Clark Neel last Fall, but since then have lost sight of them. Johnny Whitton and E. E. Fine are still here; they are building a house on the hill. Fine is doing very well—getting a great deal of work in surveying. I think this is

THE RICHEST COUNTRY
In the world, and there seems to be plenty of it. The quartz is just filled with gold and silver, but the Indians are so bad that it is dangerous for any one to venture out any distance to prospect. The redskins have run off all the stock in the country and have killed about twenty white men this winter. At present there are about 250 soldiers stationed at Deadwood, which tends to keep the Indians at bay. We have two lines of stages coming into town, one from Chayenne, another from Sidney. Next month another will be started from Fort Pierre on the Missouri river. February was a beautiful month; not a cloud was seen; but this is just the reverse, snowing and as cold as Greenland's icy mountains. There are about six thousand people now in Deadwood, and the population is being daily augmented by the crowds of immigrants flocking to the hills. We expect at least 30,000 more during the summer.

THE PRESENT OUTLOOK
Of Deadwood is big; it is bound to be the largest city in any mining country of the West. We have a great many towns in this country; the first is Custer City, but that does not amount to much; then there is Spring Creek, Golden City, Bass Buttes, Rapid City, Mountain City, Elizabeth City, Crook City, Deadwood, Gayville, Golden Gate, Lead City, South Deadwood and Cleaveland. It is also a place of gulches, and thereby hangs a tale. We have Bobtail gulch, Blacktail, Whitetail, Splittail, Potato gulch, and lots of other gulches too numerous to mention. Yours as ever,
C. H. ROBINSON.

Tilden and Mrs. Hayes.
Samuel J. Tilden is beginning to take a personal interest in the family which now occupies the White House. He walked down Broadway to Astor place on Monday, accompanied by two or three friends, and stopped at the Scribner publishing house. Two large, newly-taken photographs of the President and Mrs. Hayes were exhibited in the Scribner windows. While his friends entered the store Mr. Tilden stood for a time scrutinizing the manly, open countenance of the President, and the bright, intelligent face of Mrs. Hayes. He did not look in an unkindly way upon the portrait of Mr. Hayes, but his especial interest seemed to be in the mistress of the White House. He seemed to be impressed by the thought that it required two to make of the Presidential mansion a true home—a fitting representation of the elements of American civilization. Had the decision of the Electoral tribunal been different, there would have been a single, sad and solitary face in the window to show by whom the White House was tenanted instead of the two who now present an illustrious example of wedded happiness. But these reflections did not appear to fill the Democratic candidate with bitterness or regret, for he called out his friends and led a lively conversation on the good fortune of President Hayes in possessing a wife so intelligent and attractive in appearance. A passer-by thought he overheard Mr. Tilden remark that election tribunals, while abounding in disappointment in the selection of Presidents, might possibly be of advantage in choosing a suitable helpmeet for a bachelor candidate.

NEW TO-DAY.

INFANT MINING COMPANY.—Location of principal place of business Reno, Nevada. Location of works, Pyramid Mining District, Washoe county, Nevada.
Notice is hereby given, that at a meeting of the Board of Trustees, held on the 21st day of March, 1877, an assessment (No. 1) of three cents per share was levied upon the capital stock of the corporation, payable immediately in U. S. gold coin, to the Secretary.
Any stock upon which this assessment shall remain unpaid on the 20th day of April, 1877, will be delinquent, and advertised for sale at public auction, and unless payment is made before will be sold on Saturday, the 25th day of May, 1877, to pay the delinquent assessment, together with costs of advertising and expenses of sale.
By order of the Board of Trustees.
E. K. KENNEDY, Secretary.
Reno, March 21, 1877.

GREY & ISAACS' ADVERTISEMENT.

\$20,000!
NEW SPRING STOCK OF DRY GOODS, FANCY GOODS, MILLINERY, CARPETS, OILCLOTHS, WALL PAPER.

GENT'S FURNISHING GOODS
—JUST RECEIVED AT—
GREY & ISAACS'.

We take pleasure in announcing to the ladies of Reno and vicinity that we have now received our entire Spring stock, which will be found upon examination to be most complete in every department, having been selected with the greatest care and taste. We can safely assert, without fear of contradiction, that ladies can now make their purchases at our establishment cheaper than the same goods can be purchased from any San Francisco house. Our stock is so varied and extensive that it would be useless to attempt to enumerate it, therefore we cordially invite the ladies to call and examine our vast and most elegant assortment of goods, being assured that at all times they will receive our most courteous and polite attention whether purchasing or otherwise.

Very Respectfully,
GREY & ISAACS.

Double Sheet.
The "Weekly Journal" issued today is a fine double-sheet of eight pages, containing 56 columns, over 50 of which are reading matter. It is a paper to be proud of, and one which speaks volumes for the town of Reno. We can proudly claim that no "country" weekly paper on the Coast can compare with it. Copies can be procured at the publication office or at the Postoffice bookstore.

Fires Last Evening.
The fire bell again sounded its ominous warning last evening between 6 and 7 o'clock, and the fire boys promptly responded to the summons. The scene was a small house near Bragg & Co.'s lumber yard, and was occasioned from a defective fire, the lady of the house being engaged in getting supper at the time. The house is occupied by Mr. J. T. Fitzgerald and family. The damage to the roof is but slight, the neighbors putting the fire out with buckets just about the time the hand engine was ready to play.

About nine o'clock a second alarm was sounded, and the fireboys promptly responded. When they got down to Virginia street notice came that it was all out. The alarm was caused by a chimney in a brick house on Second street burning out.

Nautical.
Two Reno gentlemen are building a boat, with the intention of going down the river to Pyramid Lake whenever they wish to fish or hunt. The boat is made after the most approved style, neatly painted, with the words "Reno," on each side, "Pirate" in front and a ghastly skull and crossbones on the end. Though its name is ominous the parties do not intend anything dangerous to their fellow mortal, but death to all fish or fowl that may come within their reach. The craft will be launched when the water will admit of navigation. We fancy they will be busy bouncing over rocks and shooting over rapids while going down the stream.

Carelessness.
J. P. Winfrey came near being quite a loser by fire yesterday. One of his men, while smoking a pipe in the corral near the barn, allowed some of the fire to get out on some hay, and in a few moments, had it not been discovered, the fire would have communicated to the barn, and much valuable property been destroyed.

Riverside Club.
The dance last was just like the others given by this club. The style of conducting those dances are just right, the music is immense and all in all makes them the boss dances.

Fined.
Alexander Daguey, arrested for giving whisky to Indians, and released on bail, was up before Judge Richardson yesterday, and fined \$50, including costs, which he paid.

Bradley, Ralston, and the three two-year old sillies by Norfolk, purchased for the Japanese Government from Theodore Winters, were shipped to Japan by the Gaelic Wednesday.

The tea brought from China to San Francisco by the last steamer, the City of Peking, passed through Reno yesterday on route for the East.

Straw hats and water carts will soon be fashionable.
